

TD-3KW with MDS-3C V-Drums

- The most affordable kit in the V-Drums family now performs even more like the top of the line!

- The new TD-3KW takes over for the current TD-3KV and features Roland's new PDX-8 snare mesh V-pad and CY-5 hi-hat cymbal pad.

- The new PDX-8 snare mesh pad features an expanded ten-inch rim for more comfortable and quiet rim-shots, as well as separate head and rim triggering for authentic performance.

- The newly designed CY-5 cymbal pad features a 12-inch playing zone and swing movement for more drummer-friendly triggering. The pad also provides separate bow and edge triggering. The CY-5 can be also used as an additional cymbal pad, such as a splash.
